

DICKEY COUNTY

COMMISSION POLICY

SUBJECT: POLICY ON COUNTY ROAD ACCESS:

This policy sets forth the criteria for construction and maintenance of approaches accessing county highways.

The County will not pay the cost of providing access or maintaining access to county roads. All costs for new culverts and approaches are the responsibility of the part (s) requesting the approach. It is the responsibility of the requestor to complete the work or contract to have the installation of said structure completed. Regardless of the method of accomplishing the work, all construction must be in accordance with Dickey County Standards. The enclosed approach permit must be completed and approved prior to the start of work. Any approach installed or improved along a County roadway not having a permit or not meeting the specifications as outlined in this permit, after a written notice to make necessary corrections with 30 days, will be removed at the expense of the requestor by order of the Dickey County Commission.

Approaches for field access should be limited to quarter section lines. When possible, an approach on one side of the road should align with the approach on the opposite side of the road. In cases where natural barriers or unique circumstances exist, additional approaches may allow as determined by the County Road Superintendent or Engineer.

All approaches installed under this permit which require a culvert will be a minimum of 18" or larger if hydraulics requires it.

Proposed approaches require an onsite inspection which must be set up with the County Highway Superintendent Jeff Hagen (Office 701-349-3326/ Cell 701-367-2923) before application is considered for approval.

Determinations made by the County Highway Superintendent or Engineer can be appealed to the Dickey County Commission.

DICKEY COUNTY

PERMIT FOR ROAD APPROACH

Service Fee: \$100.00

Permit Fee: \$400.00

(Permit fee to be refunded after approved completion)
